MUHAMMET TAHA **NUR**

Front-end Developer

🐙 mtahanur   🐙 mtahanurclineca

SUMMARY

If you want, you can browse my portfolio directly => muhammettahanur.dev
I'm working to be a fully informed front-end developer and I'm keeping a close eye on the agenda. I learned HTML5, CSS, JavaScript, Bootstrap, Tailwind Vue.js and Angular for this. You can access the projects I developed with these languages on GitHub. I learned PostgreSQL in a database course at university. I added Redis and MongoDB over them.

EDUCATION

Çankırı Süleyman Demirel Science High School

2014 – 2018

İnönü University
